

Sushant Praveen

Software Engineer | Full Stack Developer | React.js | Node.js | Shopify Apps

📞 +91 9693814615 | ✉ sushantprem2820@gmail.com | [🌐 LinkedIn](#) | [🐙 GitHub](#) | 📍 Hyderabad, India

PROFESSIONAL SUMMARY

Full Stack Engineer with 1 year of experience designing, developing, and deploying production-grade web applications and SaaS products. Specialized in Shopify app development (OAuth, GDPR, Webhooks), enterprise authentication (Okta SSO, SAML 2.0, OIDC), and large-scale API integrations. Successfully published a production Shopify application and delivered HR, rewards, and e-commerce automation solutions. Experienced in AWS infrastructure, Linux administration, scalable backend architecture, and end-to-end product development.

EXPERIENCE

ShelfMerch

Software Engineer

Sep. 2025 – Present

Hyderabad, India

- Promoted from Associate Software Engineer (Internship) to Software Engineer within 10 months based on performance, ownership, and delivery of critical business features
- Designed and developed scalable full-stack applications using React.js, Node.js, Express.js, MongoDB, and PostgreSQL
- Architected and deployed backend services supporting 10,000+ users across production environments
- Launched and maintained a public Shopify application enabling merchants to automate product catalog synchronization and order management workflows
- Implemented Shopify OAuth, GDPR compliance workflows, webhooks, and secure merchant onboarding processes
- Delivered enterprise-grade authentication solutions using Okta SSO, SAML 2.0, OIDC, and Home Realm Discovery (HRD)
- Integrated BambooHR, Bonusly, Shopify APIs, and third-party platforms to automate employee onboarding, rewards, and redemption workflows
- Built monitoring, logging, and deployment automation processes improving system reliability and operational efficiency
- Published ShelfMerch Shopify App on the Shopify App Store and supported production releases across merchant environments

PROJECTS

ShelfMerch Shopify App — Published on App Store

- Engineered Shopify OAuth 2.0 authentication with secure token storage and session lifecycle management
- Established GDPR-compliant data governance workflows for customer deletion requests and privacy regulations
- Orchestrated real-time synchronization pipelines using Shopify product and order event webhooks
- Implemented rate limiting and API throttling to prevent abuse and manage server load
- Maintained production infrastructure with 99.9% uptime through automated deployments, monitoring, and performance tuning
- **Stack:** Node.js, Express.js, Shopify API, OAuth 2.0, Webhooks, AWS VPS, Nginx, Redis

Enterprise Corporate Gifting Platform — Toast.inc Integration

- Architected Okta SSO with SAML 2.0 and Home Realm Discovery (HRD) routing employees from multiple IdP instances to correct login endpoints
- Automated daily employee synchronization from BambooHR for 110+ users, enabling milestone-based reward distribution
- Enabled employee reward tracking and merchandise redemption through seamless Bonusly platform connectivity

- Designed multi-tenant configuration system allowing Toast to self-serve reward rule management without code changes
- Built production-grade monitoring dashboard tracking automation runs, reward awards, and audit logs
- **Stack:** Node.js, Express.js, React.js, MongoDB, Okta, SAML 2.0, OIDC, BambooHR API, Bonusly API, AWS EC2

EDUCATION

Lovely Professional University

Aug. 2020 – May 2024

Bachelor of Technology – Computer Science & Engineering

Punjab, India

- **Coursework:** Data Structures, Algorithms, Databases, Operating Systems, Computer Networks

SKILLS

Languages : JavaScript (ES6+), Python, SQL

Frontend : React.js, Redux, Context API, HTML5, CSS3

Backend : Node.js, Express.js, REST APIs, JWT, RBAC

Authentication : Okta SSO, SAML 2.0, OIDC, Shopify OAuth, JWT, bcrypt, Session Management

API Integrations : BambooHR, Bonusly, Shopify API, Stripe, Webhooks

Databases : MongoDB, PostgreSQL, Redis

Cloud & DevOps : AWS VPS, EC2, S3, Linux, Nginx, PM2, Docker

Compliance : GDPR, Rate Limiting, Data Security

CERTIFICATIONS

React Frontend Development – FreeCodeCamp (2024)

Node.js REST API Development – Coursera (2024)
